**U.S. INTERNATIONAL TRADE IN GOODS AND SERVICES**  
April 1997

The Bureau of the Census and the Bureau of Economic Analysis, through the Department of Commerce, announced today that total April exports of \$78.4 billion and imports of \$86.7 billion resulted in a goods and services deficit of \$8.4 billion, \$0.6 billion more than the \$7.8 billion in March, revised. April exports were \$0.2 billion more than March exports of \$78.2 billion. April imports were \$0.8 billion more than March imports of \$85.9 billion.

In April, the goods deficit increased \$0.2 billion from March to \$15.1 billion, and the services surplus decreased \$0.4 billion to \$6.8 billion. Exports of goods increased to \$57.6 billion from \$57.2 billion, and imports of goods increased to \$72.7 billion from \$72.0 billion. Exports of services decreased to \$20.7 billion from \$21.0 billion, and imports of services increased to \$14.0 billion from \$13.9 billion.

The March to April change in exports of goods reflected an increase in *capital goods* of \$0.8 billion (primarily telecommunications equipment). Decreases occurred in *other goods* (\$0.2 billion); *industrial supplies and materials* (\$0.2 billion); and *consumer goods* (\$0.1 billion). *Foods, feeds, and beverages* and

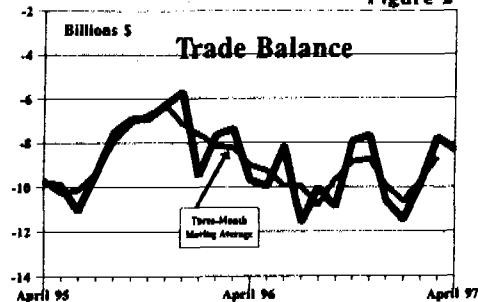

*automotive vehicles, parts, and engines* were virtually unchanged.

The March to April change in imports of goods reflected increases in *consumer goods* of \$1.2 billion (primarily apparel products; toys, games and sporting goods; and pharmaceutical products); *other goods* (\$0.2 billion); and *capital goods* (\$0.2 billion). Decreases occurred in *automotive vehicles, parts, and engines* (\$0.3 billion) and in *industrial supplies and materials* (\$0.3 billion). *Foods, feeds, and beverages* were virtually unchanged.

Note: Total goods are reported on a balance of payments basis; commodity and country detail for goods are on a Census basis. Definitions are explained in the notes starting on page 26 of this release.

Figure 2

For the three months ending in April, exports of goods and services, using a centered three-month moving average, were \$77.0 billion, while imports of goods and services averaged \$85.6 billion, resulting in an average trade deficit of \$8.7 billion. For the three months ending in March, the average trade deficit was \$9.7 billion, reflecting average exports of \$74.8 billion and average imports of \$84.5 billion.

Services exports decreased \$0.3 billion from March to April, reflecting a decrease in *travel*. Changes in other categories of services exports were small and nearly offsetting.

Services imports increased \$0.1 billion from March to April. Small increases in several categories of services imports were partly offset by small decreases in others.

#### Selected Not Seasonally Adjusted Goods Details

Advanced technology products (ATP) exports were \$15.4 billion in April and imports were \$11.7 billion, resulting in a surplus of \$3.7 billion, \$0.7 billion less than the March surplus of \$4.4 billion. April exports were \$0.8 billion less than the \$16.3 billion in March, while imports were \$0.1 billion less than the \$11.9 billion in March.

The April figures showed surpluses, in billions of dollars, with Hong Kong \$0.6 (for March \$0.7), Korea \$0.6 (\$0.7), Australia \$0.5 (\$0.8), Brazil \$0.4 (\$0.6), Argentina \$0.2 (\$0.3), and Egypt \$0.1 (\$0.3). Deficits were recorded, in billions of dollars, with Japan -\$4.8 (-\$4.6), China -\$3.5 (-\$2.6), OPEC -\$1.7 (-\$1.4), Mexico -\$1.4 (-\$1.5), Canada -\$1.0 (-\$1.3), Taiwan -\$1.0 (-\$0.7), Western Europe -\$0.5 (\$0.3), and Singapore -\$0.3 (\$0.0).

Carry-over in April was \$1.0 billion (1.7 percent) for exports and \$0.9 billion (1.3 percent) for imports. For March, revised export carry-over was \$0.2 billion (0.3 percent), revised down from \$0.5 billion (0.8 percent). For March, revised import carry-over was \$0.1 billion (0.1 percent), revised down from \$0.4 billion (0.6 percent).

## **NOTICE**

**The Bureau of the Census and the Bureau of the Economic Analysis issued today the  
U.S. International Trade in Goods and Services 1996 Annual Revisions.**

### **Goods**

The 1996 unadjusted Census Basis goods data were revised to eliminate "carry over" (that portion of the monthly statistics that arrives too late for inclusion in the transaction month) and to include errata (corrections to the published monthly data). The 1995 unadjusted Census Basis goods were revised to include errata. Once these corrections were completed, factors for seasonal, working day adjustments, and constant dollars were recomputed and the seasonally adjusted and constant dollar data were revised for 1994, 1995, 1996, and 1997.

### **Services**

Several major improvements are introduced to the services estimates. The other private services estimates reflect newly available information from BEA's Benchmark Survey of Selected Services with Unaffiliated Foreigners for 1996, BEA's Annual Surveys of Financial Services with Unaffiliated Foreigners for 1995 and 1996, which update BEA's Benchmark Survey of Financial Services for 1994, and BEA's Benchmark Survey of Foreign Direct Investment in the United States for 1992. In addition, new estimates are incorporated for transactions of temporary workers in the United States. The expanded coverage provided by the benchmark surveys and the new annual surveys of financial services is indicative of BEA's efforts to increase the coverage and quality of measurement of the services estimates. The other transportation receipts estimates reflect newly available information for ocean port service receipts and for freight charges for land transportation between the United States and Canada. The new estimates are based on new source data and BEA research. The travel and passenger fare estimates reflect unusually large revision due to the incorporation of more complete source data. In addition to these improvements, the services estimates are revised to reflect newly available and updated source data.

Note: The three-month moving averages shown in this exhibit are computed by summing the subject month, the two prior months, dividing by three and showing the average at the center month of the period. Using this method, an average is not available for the current month. A centered moving average is useful in smoothing the volatile trade data so that trends can better be discerned.

NOTE: See INFORMATION ON GOODS AND SERVICES for details concerning what is included in the Net Adjustments.

(1) The petroleum products aggregated in the end-use commodity classification system include virtually the same energy related petroleum products as those aggregated in the SITC. The end-use petroleum products, however, include some products such as ethane, butane, benzene and toluene, which

**Part A: Seasonally Adjusted****Exhibit 10. Exports and Imports of Goods by Principal End-Use Category

(1) Detailed data are presented on a Census basis. The information needed to convert to a BOP basis is not available.

(2) This exhibit is not additive. Selected countries are included in more than one area grouping. Indonesia is included in both OPEC and Other Pacific Rim; Venezuela is included in both OPEC and Other South/Central America.

(3) The export totals reflect shipments of certain grains, oilseeds, and satellites that are not included in the country/area totals.

## Part B: NOT Seasonally Adjusted

## Exhibit 14a. Exports, Imports and Balance of Goods By Selected Countries and Areas—1996

In millions of dollars. Details may not equal totals due to rounding. (-) Represents zero or less than one half of measurement shown. (R) Revised.

(X) Not applicable. This exhibit is not additive. See footnote (2).

(1) Detailed data are presented on a Census basis. The information needed to convert to a BOP basis is not available.

(2) This exhibit is not additive. Selected countries are included in more than one area grouping. Indonesia is included in both OPEC and Other Pacific Rim; Venezuela is included in both OPEC and Other South/Central America.

(3) The export totals reflect shipments of certain grains, oilseeds, and satellites that are not included in the country/area totals.

**Part B: NOT Seasonally Adjusted**

**Exhibit 15. Exports and Imports of Goods By Principal SITC Commodities:**

In millions of dollars. Details may not equal totals due to rounding. (-) Represents zero or less than one half of measurement shown.  
(R) Revised. (X) Not applicable.

## INFORMATION ON GOODS AND SERVICES

### GOODS

#### CENSUS BASIS

The Census basis goods data are compiled from the documents collected by the U.S. Customs Service and reflect the movement of goods between foreign countries and the 50 states, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, and U.S. Foreign Trade Zones. They include government and non-government shipments of goods, and exclude shipments between the United States and its territories and possessions, transactions with U.S. military, diplomatic and consular installations abroad, U.S. goods returned to the United States by its Armed Forces, personal and household effects of travelers, and in-transit shipments. The General imports value reflects the total arrival of merchandise from foreign countries that immediately enters consumption channels, warehouses, or Foreign Trade Zones.

For imports, the value reported is the U. S. Customs Service appraised value of merchandise; generally, the price paid for merchandise for export to the United States. Import duties, freight, insurance, and other charges incurred in bringing merchandise to the United States are excluded.

Exports are valued at the f.a.s.- free alongside ship value of merchandise at the U.S. port of export, based on the transaction price including inland freight, insurance and other charges incurred in placing the merchandise alongside the carrier at the U.S. port of exportation.

Monthly data include actual month's transactions as well as a small number of transactions for previous months. Each month we revise the aggregate seasonally adjusted (current and constant dollar) and unadjusted export, import and trade balance figures, as well as the end-use totals for the prior month. SITC and country detail data are not revised monthly. The timing adjustment shown in Exhibit 14 is the difference between monthly data as originally reported and as recompiled.

Annual revisions for the months are made in June to reflect corrections received subsequent to the monthly revision. These revisions are reflected in totals, end-use, SITC and country summary data.

The monthly end-use, commodity, and country and area data presented in this release are on a Census basis. This refers to Exhibits 6 - 18.

#### *U.S./CANADA DATA EXCHANGE AND SUBSTITUTION*

The data for U.S. exports to Canada are derived from import data compiled by Canada. The use of Canada's import data to produce U.S. export data requires several alignments in order to compare the two series.

1. *Coverage*--Canadian imports are based on country of origin. U.S. goods shipped from a third country are included. U.S. exports exclude these foreign shipments. For April 1997, these shipments totaled \$48.6 million. U.S. export coverage also excludes certain Canadian postal shipments. For April 1997, these shipments totaled \$8.0 million.
2. *Valuation*--Canadian imports are valued at point of origin in the United States. However, U.S. exports are valued at the port of exit in the United States and include inland freight charges, making the U.S. export value slightly larger. Canada requires inland freight to be reported. When it is not, an estimate of 4.5 percent is used. Inland freight charges for April 1997 account for 3.8 percent of the value of U.S. exports to Canada.
3. *Reexports*--U.S. exports include reexports of foreign goods. Again, the aggregate U.S. export figure is slightly larger. For April 1997, reexports to Canada were \$1,324 million.
4. *Exchange Rate*--Average monthly exchange rates are applied to convert the published data to U.S. currency. For April 1997, the average exchange rate is 1.3942 Canadian dollars per U.S. dollar.
5. *Other*-- There are other minor differences which are statistically insignificant, such as rounding error.

#### *AREA GROUPINGS (See Exhibits 14 and 14A)*

**North America** - Canada, Mexico

**Western Europe** - Andorra, Austria, Belgium, Bosnia-Hercegovina, Croatia, Cyprus, Denmark, Faroe Islands, Finland, France, Germany, Gibraltar, Greece, Iceland, Ireland, Italy, Liechtenstein, Luxembourg, Malta and Gozo, Macedonia, Monaco, Netherlands, Norway, Portugal, San Marino, Slovenia, Spain, Svalbard, Jan Mayen Island, Sweden, Switzerland, Turkey, United Kingdom, Vatican City, Yugoslavia.

**European Union** - Austria, Belgium, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal, Spain, Sweden, United Kingdom.

**European Free Trade Association** - Iceland, Liechtenstein, Norway, Switzerland.

**Eastern Europe** - Albania, Armenia, Azerbaijan, Belarus, Bulgaria, Czech Republic, Estonia, Georgia, Hungary, Kazakhstan, Kyrgyzstan, Latvia, Lithuania, Moldova, Poland, Romania, Russia, Slovakia, Tajikistan, Turkmenistan, Ukraine, Uzbekistan.

**Pacific Rim** - Australia, Brunei, China, Hong Kong, Indonesia, Japan, Korea, Macao, Malaysia, New Zealand, Papua New Guinea, Philippines, Singapore, Taiwan.

**South/Central America** - Anguilla, Antigua and Barbuda, Argentina, Aruba, Bahamas, Barbados, Belize, Bermuda, Bolivia, Brazil, British Virgin Islands, Cayman Islands, Chile, Colombia, Costa Rica, Cuba, Dominica, Dominican Republic, Ecuador, El Salvador, Falkland Islands, French Guiana, Grenada, Guadeloupe, Guatemala, Guyana, Haiti, Honduras, Jamaica, Martinique, Montserrat, Netherlands Antilles, Nicaragua, Panama, Paraguay, Peru, St. Kitts and Nevis, St. Lucia, St. Vincent and the Grenadines, Suriname, Trinidad and Tobago, Turks and Caicos Islands, Uruguay, Venezuela.

**OPEC** - Algeria, Gabon, Indonesia, Iran, Iraq, Kuwait, Libya, Nigeria, Qatar, Saudi Arabia, United Arab Emirates, Venezuela.

#### *Adjustments for Seasonal and Working-Day Variations*

Goods are initially classified under the Harmonized System (HS) which describes and measures the characteristics of goods traded. Combining trade into approximately 140 export and 140 import end-use categories makes it possible to examine goods according to their principal uses (See Exhibits 7 and 8). These categories are used as the basis for computing the seasonal and working-day adjusted data. These adjusted data are then summed to the six end-use aggregates for publication (Exhibit 6). These data are provided to the Bureau of Economic Analysis for use in the Balance of Payments and the National Income and Product Accounts.

The seasonal adjustment procedure is based on a model, which estimates the monthly movements as percentages above or below the general level of each end-use commodity series (unlike other methods that redistribute the actual series values over the calendar year). Imports of petroleum and petroleum products are adjusted for the length of the month. Because of the extremely variable movements of the data series for aircraft, users studying data trends may wish to analyze aircraft separately from other trade.

#### *Adjustments for Price Change*

Data adjusted for seasonal variation on a constant dollar basis (1992 = 100) are presented in Exhibits 10 and 11. This adjustment for price change is done at the lowest end-use level possible, then summed to the six published end-use aggregates. The deflators are primarily based upon the monthly price

indexes published by the Bureau of Labor Statistics using techniques developed for the National Income and Product Accounts by the Bureau of Economic Analysis.

#### *SITC Data*

Goods data appearing in Exhibit 15 are classified in terms of the Standard International Trade Classification (SITC) Revision 3.

Agricultural goods consist of non-marine food products and other products of agriculture which have not passed through complex processes of manufacture, such as raw hides and skins, fats and oils, and wine. A few goods such as essential oils, starches, casein, and albumin, considered to be agricultural by the U.S. Department of Agriculture, have been excluded from agricultural goods and are included in manufactured goods where they are classified in the SITC.

Manufactured goods conform to the SITC sections that include chemicals and related products, N.S.P.F.; manufactured goods classified chiefly by material; machinery and transport equipment; miscellaneous manufactured articles, N.S.P.F.; and goods and transactions not classified elsewhere.

Reexports are foreign merchandise entering the country as imports, and at the time of exportation are in substantially the same condition as when imported. Reexports, included in overall export totals, appear as separate line items in Exhibit 15.

#### *Advanced Technology Products (ATP)*

About 500 of some 22,000 commodity classification codes used in reporting U.S. merchandise trade are identified as "advanced technology" codes and they meet the following criteria:

1. The code contains products whose technology is from a recognized high technology field (e.g., biotechnology).
2. These products represent leading edge technology in that field.
3. Such products constitute a significant part of all items covered in the selected classification code.

The aggregation of the goods results in a measure of advanced technology trade which appears in Exhibit 16. This product and commodity-based measure of advanced technology differs from broader SIC industry-based measures which include all goods produced by a particular industry group, regardless of the level of technology embodied in the goods.

#### *Nonsampling error*

The goods data are a complete enumeration of documents collected by the U.S. Customs Service and are not subject to sampling errors; but they are subject to several types of nonsampling errors. The most significant of these include reporting errors, undocumented shipments, timeliness and data capture errors. For a detailed discussion of errors affecting the goods data, see "U.S. Merchandise Trade Statistics: A Quality Profile" available on the INTERNET at

<http://www.census.gov/foreign-trade/www/> or from the Foreign Trade Division.

## BALANCE OF PAYMENTS (BOP) BASIS

Goods on a Census basis are adjusted by the Bureau of Economic Analysis to goods on a BOP basis to bring the data in line with the concepts and definitions used to prepare the international and national accounts. Broadly, the adjustments include changes in ownership that occur without goods passing into or out of the customs territory of the United States. These adjustments are necessary to supplement coverage of the Census basis data, to eliminate duplication of transactions recorded elsewhere in the international accounts, and to value transactions according to a standard definition.

The export adjustments include:

**U.S. military sales contracts** - This *deduction* of U.S. military sales contracts is made because the Census Bureau has included these contracts in the goods data, but BEA includes them in the service category "Transfers Under U.S. Military Sales Contracts." BEA's source material for these contracts is more comprehensive, but has no distinction between goods and services.

**Private gift parcels.** This *addition* is made for parcels mailed to foreigners by individuals through the U.S. Postal Service. (Only commercial shipments are covered in Census goods exports.)

**Gold exports, nonmonetary.** This *addition* is made for gold that is purchased by foreign official agencies from private dealers in the United States and held at the Federal Reserve Bank of New York. The Census data only includes gold that leaves the customs territory.

Some smaller adjustments are also made to exports:

*Deductions* for repairs of goods, exposed motion picture film, and military grant-aid. *Additions* for sales of fish in U.S. territorial waters, exports of electricity to Mexico, and vessels and oil rigs that change ownership for which no export document is filed.

The import adjustments include:

**Inland freight in Canada.** An *addition* is made for inland freight in Canada. Imports of goods from all countries are valued at the foreign port of export, including inland freight charges ("customs value"). In the case of Canada, this should be the cost of the goods at the U.S. border. However, the customs value for imports for certain Canadian goods is the point of origin in Canada. The BEA makes an *addition* for the inland freight charges of transporting these Canadian goods to the U.S. border to make the value comparable to the customs value as reported by all other countries. Insurance and freight charges for transporting goods to the United States from all other countries to the U.S. border are included in services by the BEA. (The same procedure is used for Mexico as an Other Adjustment, but is much smaller.)

**Gold imports, nonmonetary.** This *addition* is made for gold sold by foreign official agencies to private purchasers out of stock held at the Federal Reserve Bank of New York. The Census data only includes gold that enters the customs territory.

**Imports by U.S. military agencies.** This *deduction* of U.S. military sales contracts is made because the Census Bureau has included these contracts in the goods data, but BEA includes them in the service category "Direct Defense Expenditures". BEA's source material is more comprehensive, but has no distinction between goods and services.

Some smaller adjustments are also made to imports: *Deductions* for repairs of goods, and exposed motion picture film. *Additions* for imported electricity from Mexico, conversion of vessels for commercial use, and repairs to U.S. vessels abroad.

## SERVICES

The statistics are estimates of services transactions between foreign countries and the 50 states, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, and other U.S. territories and possessions. Transactions with U.S. military, diplomatic, and consular installations abroad are excluded because they are considered to be part of the U.S. economy.

Services are shown in seven broad categories. Types of services for imports and exports are the same for six of the seven categories. For the seventh, exports is "Transfers Under U.S. Military Sales Contracts" while for imports the category is "Direct Defense Expenditures". The following is a brief description of the types of services included in each category:

**Travel** - Purchases of services and goods by U.S. travelers abroad and by foreign visitors to the United States. A traveler is defined as a person who stays for a period of less than 1 year in a country of which the person is not a resident. Includes expenditures for food, lodging, recreation, gifts, and other items incidental to a foreign visit.

**Passenger Fares** - Fares paid by residents of one country to residents in other countries. Receipts consist of fares received by U.S. carriers from foreign residents for travel between the United States and foreign countries and between two foreign points. Payments consist of fares paid by U.S. residents to foreign carriers for travel between the United States and foreign countries.

**Other Transportation** - Charges for the transportation of goods by ocean, air, waterway, pipeline, and rail carriers to and from the United States. Includes freight charges, operating expenses that transportation companies incur in foreign ports, and payments for vessel charter and aircraft and freight car rentals.

**Royalties and License Fees** - Transactions with foreign residents involving intangible assets and proprietary rights, such as the use of patents, techniques, processes, formulas,

designs, know-how, trademarks, copyrights, franchises, and manufacturing rights. The term "royalties" generally refers to payments for the utilization of copyrights or trademarks, and the term "license fees" generally refers to payments for the use of patents or industrial processes.

**Other Private Services** - Transactions with affiliated foreigners, for which no identification by type is available, and of transactions with unaffiliated foreigners. (The term "affiliated" refers to a direct investment relationship, which exists when a U.S. person has ownership or control, directly or indirectly, of 10 percent or more of a foreign business enterprise's voting securities or the equivalent, or when a foreign person has a similar interest in a U.S. enterprise.) Transactions with unaffiliated foreigners consist of education services; financial services (includes commissions and other transaction fees associated with the purchase and sale of securities and noninterest income of banks, and excludes investment income); insurance premiums and losses; telecommunications services (includes transmission services and value-added services); and business, professional, and technical services. Included in the last group are advertising services; computer and data processing services; database and other information services; research, development, and testing services; management, consulting, and public relations services; legal services; construction, engineering, architectural, and mining services; industrial engineering services; installation, maintenance, repair of equipment; and other services, including medical services and film and tape rental.

**Transfers Under U.S. Military Sales Contracts (*Exports only*)** - Exports of goods and services in which U.S. Government military agencies participate. Includes both goods, such as equipment, and services, such as repair services and training, that cannot be separately identified.

**Direct Defense Expenditures (*Imports only*)** - Expenditures incurred by U.S. military agencies abroad, including expenditures by U.S. personnel, payments of wages to foreign residents, construction expenditures, payments for foreign contractual services, and procurement of foreign goods. Includes both goods and services that cannot be separately identified.

**U.S. Government Miscellaneous Services** - Transactions of U.S. Government nonmilitary agencies with foreign residents. Most of these transactions involve the provision of services to, or purchases of services from, foreigners; transfers of some goods are also included.

Services estimates are based on quarterly, annual, and benchmark surveys and partial information generated from monthly reports. Service transactions are estimated at market prices. Estimates are seasonally adjusted when statistically significant seasonal patterns are present. No country or area detail is available due to the lack of adequate source data upon which to base estimates.

The revision policy is as follows: Each month a preliminary estimate will be released for the current month and a revised estimate for the immediately preceding month. After a revised month is released, no further changes will be made until the quarterly international transactions estimates, based on more complete source data, are released. The first monthly release that follows the quarterly international transactions release will contain revised estimates for the previous six months, in order to align the monthly estimates with the quarterly estimates. Annual revisions for the months and quarters are made in June, which incorporate updated source data and changes in estimating methodologies.

#### MONTHLY RELEASE SCHEDULE

1997	DATE	DAY
Jan . . .	3-20-97	Thu
Feb . . .	4-17-97	Thu
Mar . . .	5-21-97	Wed
Apr . . .	6-19-97	Thu
May . . .	7-18-97	Fri
Jun . . .	8-20-97	Wed
Jul . . .	9-18-97	Thu
Aug . . .	10-21-97	Tue
Sep . . .	11-20-97	Thu
Oct . . .	12-18-97	Thu
Nov . . .	1-21-98	Wed
Dec . . .	2-19-98	Thu

Quarterly and annual estimates of services are included as part of the U.S. international transactions accounts, published in the April, July, October, and January issues of the Survey of Current Business. Releases are scheduled for June 19, September 11, and December 10, 1997. The Survey is available from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

## ELECTRONIC AVAILABILITY.

**Exhibit 2. U.S. Exports of Goods by State Where the Exporter is Located, by SIC-Based Product Code Groupings, Not Seasonally Adjusted: April 1997 and Cumulative to Date, 1997**

In millions of dollars Foreign Trade Zone (FTZ) shipments are included in the U. S. total and distributed among individual states and territories. Separate FTZ total line is for reference only. Details may not equal totals due to rounding. (X) Not applicable.

(-) Represents zero or less than 0.05 percent.

										216.7

(1) Includes agricultural, forestry, fishery products, mineral commodities, scrap, waste, used or second-hand merchandise and timing adjustments. (2) Significant data are compiled for the District of Columbia because there are concentrations of entities domiciled there such as, embassies of foreign governments, purchasing agents for foreign companies and countries that arrange for exports of goods. (3) Includes cases where no valid zip code was reported on Shipper's Export Declaration (SED's) and includes prior month's revision to Canada.

**Exhibit 2A. Origin of Movement of U. S. Exports of Goods by State by SIC-Based Product Code Groupings, Not Seasonally Adjusted: April 1997 and Cumulative to Date, 1997**

In millions of dollars. Foreign Trade Zone (FTZ) shipments are included in the U. S. total and distributed among individual states and territories. Separate FTZ total line is for reference only. Details may not equal totals due to rounding. (X) Not applicable.

(-) Represents zero or less than 0.05 percent.
